

Job Interview Video Assessment

Today you will begin creating a video that demonstrates how to properly answer 5 commonly asked job interview questions. Requirements for this assignment include:

- You must work in groups of 3 people for this class.
- Each group member must appear in the video answering at least one interview question.
- We will shoot and edit the videos in class.
- We will use Movie Maker to edit your video (if you have your own video editing software, feel free to use it, but you are responsible for the finished product).
- Each interview question in the video must be introduced by text or a title slide.
- Answers to each interview question must be appropriate and professional.
- Credits with each group members name must be included at the end.

This will count as a summative assessment. A scoring guide is provided on the next page.

Job Interview Video Scoring Guide

1. All group members appear in video	5
2. Each question is answered appropriately and professionally	25
3. Each question is introduced with text or title slide	5
4. Credits with group member names included at end of video	5
5. Video is neatly edited with no errors	10
Total	50
